

Notice to Customers of the Campbell County Utilities and Service Authority
Central System Waterworks in the area along **Rainbow Forest Drive (from Sleepy
Hollow Road to Waterlick Road)**

BOIL YOUR TAP WATER

Failure to follow this advisory could result in stomach or intestinal illness.

The Virginia Department of Health, in conjunction with the Campbell County Health Department, and Campbell County Utilities & Service Authority (CCUSA), are advising residents to use boiled tap water or bottled water for drinking and cooking purposes as a safety precaution. This notice is **precautionary in nature** and is necessary because **of a waterline leak in the area which resulted in a loss of water pressure.** Effective **9/20/2026.**

DO NOT DRINK TAP WATER WITHOUT BOILING IT FIRST

Boiled or bottled water should be used for drinking, beverage and food preparation, and making ice. Boiling kills bacteria and other organisms in the water. Boiling is the preferred method to assure that the tap water is safe to drink. Bring all tap water to a rolling boil, **let it boil for one (1) minute**, and let it cool before using water.

If you cannot boil your tap water....

- An alternative method of purification for residents that do not have gas or electricity available is to use liquid household bleach to disinfect water. The bleach product should be recently purchased, free of additives and scents, and should contain a hypochlorite solution of at least 5.25%. Public health officials recommend adding 8 drops of bleach (about ¼ teaspoon) to each gallon of water. The water should be stirred and allowed to stand for at least 30 minutes before use.
- Water purification tablets may also be used by following the manufacturer's instructions.

To address this problem, we have repaired, chlorinated and flushed the damaged waterline. We are restoring service, but you need to continue to boil your tap water until the results of bacteriological samples are received. The results of the tests are expected on **or about September 21, 2026, at 5:00 PM. If the results are NOT satisfactory, you will be given further instruction on September 21, 2026, by Delivery of another handout.**

For more information, please contact the CCUSA office at 20644 Timberlake Road, Lynchburg, VA 24502 or at (434) 239-8654.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

Date: **September 20, 2026**
